

# Accelerating transformation across the Built Environment value chain

## Further support for industry transformation

### Introduce new Growth and Transformation Scheme (GTS)

Support value chain approach for transformation through formation of strategic alliances

Alliances to implement best-in-class initiatives in productivity, digitalisation and sustainability, and achieve higher workforce development and business growth outcomes

### Extend Construction Productivity and Capability Fund (CPCF)

Extend the CPCF by one year until March 2022

Maintain funding support of 80% for the Productivity Innovation Project (PIP) under CPCF until March 2022

## Raise buildability standards

Raised minimum Buildable Design Scores (B-scores) for large residential developments in December 2019

Will raise minimum B-scores for large industrial, commercial and institutional developments from April 2022 to help make Design for Manufacturing and Assembly (DfMA) the default method of building for all developments
