SUMMARY

Marsha's birthday is coming up, and she needs to make some friends to invite to her party. She's a little stumped...but a scientist knows how to solve problems: the scientific method!

AS YOU READ

- How many items are attracted to Marsha's magnetic suit in her kitchen?
- How about when she was at school?
- Who tried to help Marsha when she was stuck under all the kids?

(just for fun)

- Have you ever tried to create your own magnetic suit like Marsha?
- Have you ever felt like Marsha did while she tried to make friends?

BEFORE YOU READ

We have learnt about attraction as a magnetic force. Do you know if the word "attract" has other meanings?

REFLECTION QUESTIONS

- How is the beginning of the story different from the end? What happens to Marsha when she learns about making friends?
- What could Marsha have done differently?
- Which is your favourite part of the story?

YOUR THOUGHTS!
