

CONVENIENT TESTING AT YOUR DOORSTEP

WHAT IS IN-DORM ROSTERED ROUTINE TESTING?

In-dorm Rostered Routine Testing (RRT) is the carrying out of COVID-19 swab tests for migrant workers within the dormitory itself.

WHY IS IN-DORM RRT BENEFICIAL?

In-dorm RRT provides increased convenience as transport will not be required due to tests being conducted on-site. For dormitories where night swabs are available, workers will be able to get tested after work.

Employers are encouraged to log on to the [Swab Registration System](#) to schedule or change their workers' appointments

WHERE ARE THE TEST SITES?

In-dorm RRT is currently available at 33 dormitories. Night swabs are also available for certain dormitories. Please refer to the next page for the complete list.

HOW IS THE SWAB TEST CONDUCTED?

Testing will be done via a new OP/MT method where the swab is passed mid-way through the nose. This makes the test more comfortable for workers.

DORMITORIES WITH IN-DORM RRT

1. Acacia Lodge*
