Student Learning Space

SLS Website: <https://learning.moe.edu.sg>

As part of its commitment to nurturing future-ready learners, the Ministry of Education had announced that all students in Singapore schools will be supported in their learning by the Singapore Student Learning Space (SLS), an online learning platform that contains curriculum-aligned resources and learning tools. With the SLS, students will be able to learn better through the use of technology.

Students will be able to learn anytime, anywhere, and at their own pace, whether independently or with their peers. Teachers will also be able to use the SLS to complement their classroom teaching, further enriching students' learning experience. We believe such a learning experience is essential to help students to become an active and confident user of technology.

The Singapore Student Learning Space (SLS) is accessible through the Internet browsers on either Windows PC, Mac, iPad or Android tablets (with screen size larger than 7 inches for good user experience). However, the system is currently not optimised for use on these devices.

Student- Initiated Learning (SIL)
