HortPark

the gardening hub

"Look deep into nature, and then you will understand everything better."

Albert Einstein

HortPark is a one-stop gardening hub that brings together recreational, educational, research and retail activities in a park setting. It also serves as a knowledge centre for plants and gardening by providing greening ideas and solutions through showcase gardens, and offering a platform for the horticulture and landscape industry to share best practices, products and services.

HortPark is part of the Southern Ridges that comprises other parks such as Mount Faber Park, Telok Blangah Hill Park, Kent Ridge Park and Labrador Nature Park. Popular with gardening enthusiasts, families, and community groups who yearn for a tranquil environment in which to relax, it is also frequently visited by nature lovers who enjoy walks along the Southern Ridges.

Check out www.nparks.gov.sg/hortpark or call 6471 5601 for information on:

- Talks and workshops
- Events and tours
- School programmes and activities
- Volunteer programme
- Partnership opportunities

Open daily from 6 am to 11 pm, HortPark is a smoke-free park offering barrier-free accessibility.

PROGRAMMES AND ACTIVITIES

HortPark organises a variety of community-led programmes and activities, which are held on-site and online, to promote gardening as a hobby and lifestyle choice. For more info and enquiries, please call 6471 5601 or email NPARKS_HortPark@nparks.gov.sg.

GUIDED TOURS

Everyone loves a stroll in the garden. Learn about interesting plants and gardening ideas as we take you through the various themed gardens in HortPark.

Through the Bees and Butterflies Trail Tour, observe bee habitats, spot different bee species and learn about the many benefits of our docile, native bees. You can also look out for butterflies and observe the different stages of their life cycle in the Butterfly Garden.

In the Edibles Tour, explore the wide variety of fruits, vegetables, herbs and spices grown in our Edible Garden, Valley of Edibles and My Backyard Kitchen. Discover different native plant species and their functions in the five zones in the Native Garden Walk.

WORKSHOPS

Gardening can have a therapeutic effect on busy urbanites. Roll up your sleeves and create your own gardens, or learn how to care for your plants at home. You can join us from the comfort of your own home for online gardening tutorials, talks and demonstrations.

ECO-LEARNING JOURNEY*

Choose from a range of interactive and educational learning journeys catering specially for children in the pre-school and primary school levels. See, smell and touch different plants and learn about the various seed dispersal methods at the Pitter Patter Potter Garden.

*This programme is funded by the Garden City Fund for MOE and ECDA registered schools

GARDENERS' DAY OUT

Network and share gardening tips with fellow like-minded enthusiasts at HortPark's monthly gardening event. Gardeners' Day Out takes place every month, featuring a variety of programmes available on-site and/or online through NParks' digital channels. Highlights include a Gardeners' Market, guided group tours, workshops and children's activities. For more info on Gardeners' Day Out, visit www.nparks.gov.sg/GDO

COMMUNITY GARDEN FESTIVAL

Held once every two years, the Community Garden Festival celebrates the joy of gardening with the community through a myriad of fun-filled activities for the whole family. This includes gardening webinars, horticultural showcases, garden displays, edibles competition and a marketplace.

VOLUNTEER OPPORTUNITIES

Put your green fingers to work and learn more about gardening. Be part of the HortPark community and support us in our programmes and activities.

For more information, visit www.volunteer.gov.sg or email NPARKS_HortPark@nparks.gov.sg

GATE ACCESS HOURS

From 6 am to 11 pm daily

- A** Main Entrance
- B** Alexandra Technopark
- C** Alexandra Terrace
- D** Alexandra Link to Kent Ridge Park
- E** 100K Pasir Panjang Road

Tranquillity Zone

Set aside your worries and unwind at open areas such as the Event Lawn, or reflect upon the serene waters at the Irrigation Pond.

Exploratory Zone

Let ideas take flight at the Exploratory Zone! Be wowed by novel gardening techniques, and step into various enchanting gardens. If you have a great idea to share, talk to us!

Ornamental Zone

Lush blooms greet you as you arrive at HortPark via the HortCentre. You can easily get ideas for greening up your home with the vibrant displays in this zone.

Streets of Singapore Walk

This zone is planted with trees that have contributed their names to some of Singapore's roads and towns. See if you know all the roads/trees!

1

HortHouse

Built in the early 20th century, this colonial bungalow was designed in the Arts and Crafts style, with its steeply-pitched tile roof and gable wall. Closely tied to Singapore's rail history, this building was gazetted for conservation in 2014, and restored in 2017 as the Centre for Urban Greenery and Ecology (CUGE).

2

Floral Walk

Floral Walk is the welcoming gateway that leads visitors into HortPark. It is a tropical cut flower garden which features a range of heliconia, ginger and banana plants that produce flamboyant flowers, and filler plants with ornamental foliage often used for flower arrangements.

3

Vertical Greenery

These vertical gardens provide a green solution to enhance any building facade. They also offer thermal insulation for buildings. Plants grown on the vertical gardens filter the air and provide habitats for urban wildlife.

4

My Backyard Kitchen

A 'backyard kitchen' is based on the idea of a backyard garden being the extension of a kitchen, by providing ingredients for food and beverages. It can be located anywhere – a plot at the back of one's house, along corridors, or even in balconies. This series of gardens showcases edibles that can be used for teatime snacks, desserts and beverages.

5

Espalier Garden

The art of espalier (the growing of plants against a flat surface or structure) produces attractive designs. Espalier plants bear fruits in larger volumes than usual, and the fruits are within easy reach. Learn how to start growing your own espaliers!

6

SG50 Community in Bloom Gardens

Launched at the Community Garden Festival in 2015, the SG50 Community in Bloom Gardens celebrate Singapore's Golden Jubilee. The celebratory gardens revolve around the themes of 'People & Plants', 'People & Spaces', and 'People & Landscapes'.

7

Pitter Patter Potter Garden

Mirrored after the primary school's social and natural science curricula, it features a 'Classroom in a Garden' suitable for learning about seed dispersal methods and concepts such as recycling.

8

Native Garden

This garden is populated with plant species that are native to Singapore. It also features an extended area where native plants are categorised based on how they are used – as medicine, food, timber or to enhance habitats for birds and butterflies.

9

Edible Garden

Take in the sights and smells of common and exotic edible plants in the Edible Garden. Comprising fruit and vegetable plots, it demonstrates that edible gardens can be functional, educational and attractive.

10

Allotment Garden

The Allotment Garden comprises 2.5 m x 1 m raised planter beds rented out to members of the public who wish to nurture their green fingers. Equipped with built-in storage and nearby water points, each plot can be leased for three years.

11

Therapeutic Garden

Come relax and unwind at the Therapeutic Garden. Designed using the principles of horticultural therapy, this well-shaded garden uses attractive colours, interesting textures and sounds of nature to intrigue and invigorate visitors.

12

Butterfly Garden

This garden is planted with suitable nectar and host plants for breeding a variety of butterflies, including those deemed to be vulnerable. Visitors can also learn about the importance of butterflies in our local ecosystem.

13

Nature Playgarden

Designed with pre-schoolers in mind and built with natural materials, the Nature Playgarden encourages children to spend more time outdoors and reconnect with nature. Let them explore the nine different play features while enjoying the breeze and leaves rustling in the wind.
