

## Community Sharing – Lesson material

### Full Name

Rebecca Lee

### School / Organisation

CPDD HUMB

### Level

Lower Secondary – Sec 2

### Cluster / Topic

Transport Systems - GQ4 – How can these relationships be sustainably managed?

Learning Outcomes – Students should be able to explain the strategies taken to sustainably manage transport systems in Singapore and other countries using texts or images

### Use Case

This resource can be used as a case study. Students can review these resources before the lesson and a class discussion is conducted to summarise and highlight the main ideas in the resource.

Then, will engage in a role play debate. Groups can play the roles of the government, a taxi driver, the commuter, the environmentalist, the LTA and a car salesperson. They can debate whether the car lite lifestyle is a possibility and the benefits and drawbacks of developing a car-lite society.
