

# Community Sharing – Lesson material

## Full Name

Muhammad Firdaus Zainal

## School / Organisation

New Town Secondary School

## Level

Lower Secondary – Sec 2

## Cluster / Topic

Housing – Sparking Curiosity

## Use Case

Using the article and videos, teachers can use this to spark discussions about what makes a neighbourhood sustainable beyond just environmental aspects, including social and community dimensions. Teachers can organize role-playing activities where students take on the roles of different stakeholders (residents, town council members, urban planners) to understand different perspectives and negotiate solutions. Teachers can also lead discussions on conflict resolution, community engagement, and the role of authorities in managing shared urban spaces.
