# Recommendations (for web version on work/GSIB or Internet laptop)

You can find courses recommended for you on **Daily Feed**. Scroll down to **Recommendations**, where you will find three sections with recommendations based on different criteria.

What is popular on LEARN
>   Courses here are based on their ratings, how many users have enrolled in them, and how many users have completed them.
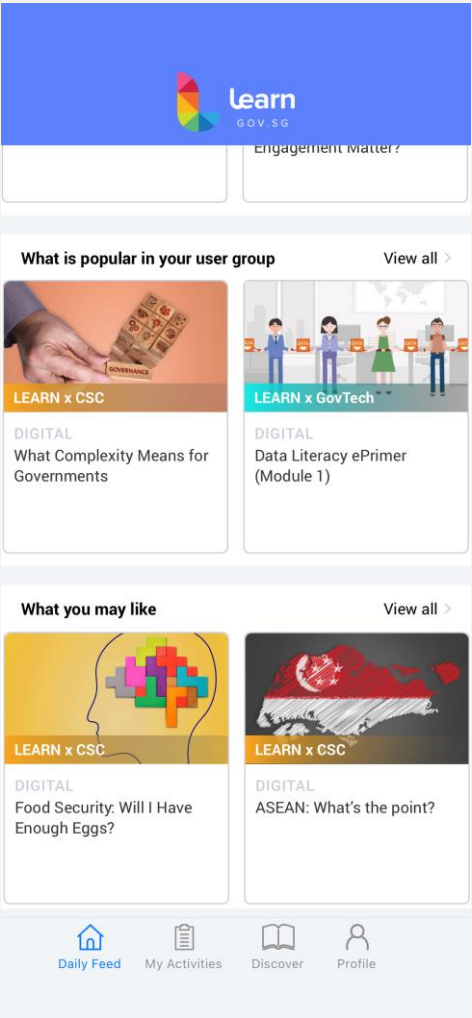

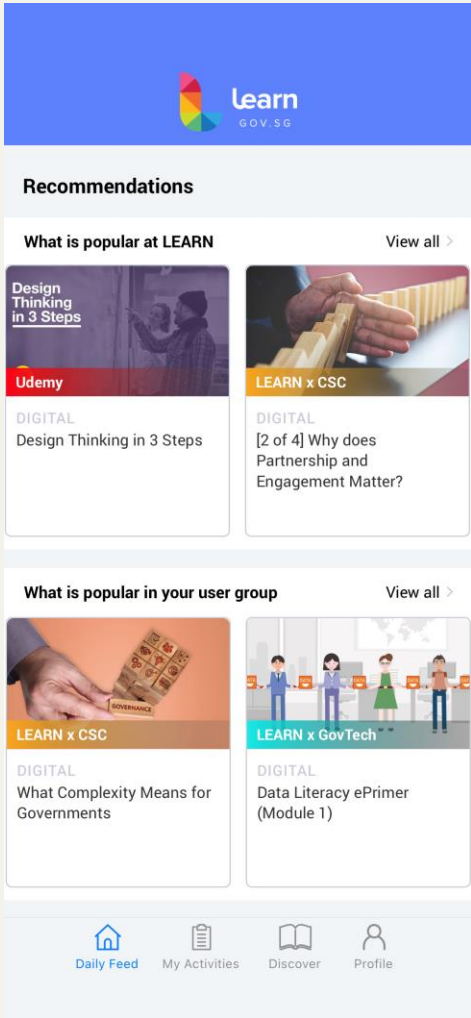

What is popular in your User Group
>   Courses here are recommended using the same criteria as **What is popular on LEARN**, but based on the organisation you are in.

What you may like
>   Courses here are based on the **Interest Areas** you selected when you first activated your account. To update your **Interest Areas**, hover over the **Profile** icon in the top, right corner, then click **Update My Interest Areas**.

Recommendations (for mobile)

Recommendations are also available to you on the app.

Like on the web version, you can find recommended courses on **Daily Feed**.
