

Name: Srinivasan Nitin

School and Club: Riverside Secondary School Robotics Club

Level: Secondary 4

On 23 Feb 2023, six members of the Robotics Club embarked on an inspiring journey to introduce a group of twenty enthusiastic Boys from the Boys Brigade to the world of programming. Our approach was dynamic and inclusive, blending hands-on activities and interactive sessions to foster a nurturing learning environment. Starting with the basics, we guided the boys through Scratch, Microbit and Python. As they delved deeper into coding, they not only honed their technical skills but also imbibed vital values like collaboration, perseverance, and problem-solving. After the session, one of the boys stated that it was the best and most effective coding lesson ever. They requested a follow up session, and though it was supposed to be a one-day course, we duly obliged the following week. This made us proud as we were able to empower them with the knowledge and virtues to thrive in the digital age. (149 Words)
